

BRISTLECOMB PINE-BEAUTY THAT LIVES ON AND ON. MT. HOOD FROM ZIG ZÃG CANYON

-Photo by A. Sherwood

It's the great, big broad land 'way up yonder,
It's the forests where silence has lease;
It's the beauty that thrills me with wonder,
It's the stillness that fills me with peace.

Fall 1960

Spring 1961

TERMS AND INFORMATION

THE SHERWOOD NURSERY COMPANY located six miles east of Gresham, Oregon, are leading propagators and growers of conifers and broad leaved evergreens. Shipping Season: Plants can be shipped from our nursery from about October 1, throughout the fall, winter and spring to about May 1.

TERMS:

Our terms are NET CASH. Note carefully the following conditions:

- We PAY SHIPPING COSTS on lining out stock to all points in the United States and Canada except Alaska and Hawaii. Lining out stock for this purpose is defined as any stock not listed as B&B or BR.
- 2. At least ONE-FOURTH of the purchase price must accompany all orders. Balance C.O.D. Payment in full prior to shipping required on all B&B, BR and Canadian shipments. NO ORDERS ACCEPTED UNLESS ACCOMPANIED BY AT LEAST 25% OF THE PURCHASE PRICE. You will save unnecessary correspondence and loss of time by observing this regulation. To save cost and inconvenience of C.O.D., payment in full should accompany orders of \$20.00 or less. No Canadian shipments accepted for less than \$40.00.
- 3. The prices quoted are NET CASH PRICES. F.O.B. Gresham. POSITIVELY NO ORDER for lining out stock will be accepted for less than 25 plants of the same size and variety. Prices quoted in the 10, 100, or 1000 lots apply to ONE SIZE and ONE VARIETY only.

We reserve the right to substitute grades when necessary.

Five plants of same variety and size at 10 rate; 25 at 100 rate; 250 at 1000 rate.

B&B signifies balled and burlapped; BR, bare roots; in., inches; transp., transplanted.

- The prices quoted herein will hold only throughout the coming nursery year and supersede all other prices.
- 5. Orders will be dug and shipped promptly in the order in which they are received and as soon as digging conditions will permit. We aim to take care of all orders without unnecessary delay. NO STOCK CAN BE RESERVED LATER THAN APRIL 1. Orders coming in after April 1 will be shipped as soon as possible.

PACKING:

No packing charge is made on any stock.

We are shipping many small balled grades safely and profitably to the buyer packed BR (Bare Roots) thereby cutting down shipping costs. Where this can be done we have so indicated. Our method of packing insures the arrival of plants in perfect condition at any place in the United States and Canada.

RESPONSIBILITY:

All the stock offered by this Company is grown out of doors and in its own fields, with the greatest care and packed in like manner. WE MAKE NO GUARANTEE, either expressed or implied, that the plants will grow or give specific results. ALL SHIPMENTS ARE MADE AT THE RISK OF THE PURCHASER AFTER BEING DELIVERED TO THE CARRIER IN GOOD CONDITION. We accept all orders upon condition that they shall be void should frost, storm, crop failure or other cause result in injury or destruction of stock, or in inability to deliver.

SHERWOOD AZALEAS

(Originated and introduced by Sherwood Nursery Co.)

Sherwood Cerise Azalea

A wonderful dwarf evergreen. Hardy and compact. Foliage dense, dark green. Flowers bright clear cerise, very lovely and borne in marvelous profusion completely covering the plant. Many consider this the best azalea we grow. Sherwood Cerise Azalea is brilliantly lovely. It has a great future. We have never been able to keep up with the demand.

Sherwood Orchid Azalea

This is a hybrid hinodegiri and our own introduction. We have been growing it for several years in our nursery where it has attracted much attention. Foliage about the size of the Hinodegiri Crimson Azalea but the plant is hardier. Flowers are a clear lavender with speckled throat, completely cover the plant and are large for a dwarf azalea. This evergreen fills a need which has not been met by any other azalea. Although showy it harmonizes with other colors in the garden. Mass plantings in gardens or on slopes and terraces are unexcelled. It has proved itself to be the hardiest evergreen azalea that we grow.

Sherwood Orchid Azaleas in front of President's home, Linfield College.

Sherwood Red Azalea

A magnificent azalea. Compact, dwarf, and evergreen. Foliage so glossy it shines, bright green turning in cold weather to fiery red. Better foliage than Azalea hinodegiri from which it was hybridized. Flowers in such abundance that the foliage is almost entirely hidden and of the most brilliant blood red imaginable, brighter by far than Azalea hinodegiri. Hardy. Words utterly fail to describe Sherwood Red Azalea. We consider it the finest, dwarf, red azalea ever offered the nursery trade. It has every-

thing: hardiness, clean habit of growth, easy cult almost unbelievable showiness of inflorescence.	ture, sple	ndid foli	age and

CHAMAECYPARIS (kam-e-sip'ah-ris)

Chamaecyparis lawsoniana ellwoodi (Ellwood Cypress)

A semi dwarf and comparatively new addition to the cypress family which has added such a long list to the trees that we admire and love. Ellwood Cypress is a trim, compact, narrow pyramid with soft, feathery, bluish green foliage. It is superior to many of the older forms of cypress with which we are familiar and certainly will replace some of them. Naturally grows in its lovely form with scarcely any pruning. Hardy.

Chamaecyparis lawsoniana grandi

A low flat pyramid, having wonderful green foliage of unusual density. Naturally of shapely form and needing no pruning. Grows to a height of 6 to 8 feet and has a spread considerably broader. Very desirable where neatness and perfection are desired.

3-	6	inches once transplanted	 	16	144
6-	9	"	 ******	20	180

Chamaecyparis lawsoniana monumentalis

A tree of great beauty, an upright slender column with the sky blue or azure foliage which everyone admires in a conifer. It has a strong central leader with vertical branches growing close to the trunk. Requires scarcely any care and develops into loveliness from year to year. As narrow as Pyramidal Arborvitae. Hardy. Rare. An excellent landscape subject which gives good height in a minimum of space. A magnificent specimen.

Hedera helix (English Ivy) (hed'er-ah)

The well known, long lived, high climbing or creeping evergreen vine, a very variable species, of which more than 60 varieties are cultivated in European gardens. The Ivy is native in Europe, Africa and Asia. The type which we are offering is the standard variety and the one which is much grown in city parks and in estates. It has few peers for covering extensive slopes, banks or steep terraces in either sun or shade.

Holly-See Ilex

Hollygrape—See Mahonia

Honeysuckle—See Lonicera

Huckleberry-See Pernettya, Vaccinium

Hypericum calycinum (Aaronsbeard St. Johnswort) (hy-per'i-kum)

A subshrub growing to a height of one foot. A rapidly spreading plant creeping by woody root stalks and completely covering the soil. Splendid and very effective ground cover in sunny places. Blooms from June to August. Large golden yellow flowers. Hardy.

Mahonia aquifolium

(Oregon Grape) (mah-hoh'ni-ah)

> An ornate little evergreen shrub, native of Oregon, where it is much loved and enjoyed. Leaves are holly like and bright green. Has long clusters of bright golden yellow flowers in the spring followed by bunches of bright blue grape like berries which are sometimes used for jelly making. Attractive in foliage, flower and fruit. Also fine for interior decorative purposes. Some leaves take on autumn tints of crimson, deep red, bronze and gold. The shrub at its best in group plantings. One of the hardiest of the broad leaved evergreens. Height variable from three feet.

Picea excelsa (Sherwood Multnomah Spruce)

A spruce that is new and entirely different. It may be described as being compact but of irregular, flattened, globe-like habit of growth. The parent tree, which is 50 to 60 years of age, is five feet tall and 10 feet across. The outstanding individuality of this hardy spruce makes it admirably fitted for naturalistic and picturesque plantings. The irregular outline gives it a rugged appearance, and because of this makes it the most adaptable of the dwarf spruces for mass planting. Few trees in our nursery attract more attention than the thick growing parent tree. Unusually hardy.

PINUS (PINES) (py'nus)

Pinus aristata

(Bristlecone Pine)

THE INCREDIBLE CONI-FER. The oldest known living thing. This is the tree which lives to the unbelievable age of 4600 years which outdates the oldest Sequoias by 15 centuries. This is the rugged denizen from our high mountains. Almost without doubt the world's most beautiful conifer. Persons who see it are extravagant in their praise. It grows native above 9,000 feet elevation which makes it monarch of the peaks. It grows above and where nothing else can survive. In its native environment the oldest

Bristlecone Pine in bloom. The tan colored flowers are male. The little blue female flower develops a year later into a cone (lower center) which still another year later becomes a fully opened cone (upper center).

known trees are only 15 to 20 feet high with extremely heavy, twisted, contorted trunks. Their fabled beauty is so profound that it humbled the beholder. In the nursery it reaches a two foot height in seven years. This is an evergreen of superlatives:

It is the oldest known living thing.
 It does well at all elevations from sea level to 12,000 feet.

3. It withstands a temperature range of over 150 degrees: from 50° below to over 100° above.

4. It does well with the desert humidity of two or three per cent or the 70 per cent along the coast.

5. It holds its needles for 20 years which is more than three times as long as the average conifer.

6. It will stand poor soil. In its native habitat it often grows in pure gravel.

7. It makes a remarkably fine root system and moves easily.

8. The finest bonsai subject.

9. With a slight pruning it becomes as slender as a Pyramidal Arborvitae or if topped back when young it spreads laterally almost like a creeping iuniper

Needles are one to two inches long and completely clothe the branchlets. Color unusually dark green, unusually dark in appearance, often speckled like frost with resin exudations. You will hear much more about this most beautiful of all conifers for landscape purposes.

TAXUS (YEWS) (taks'us)

Taxus baccata (English Yew)

This is the old favorite of English gardens. Native of Europe and North Africa to the Himalayas. Deep green, rapid growing in good soil, very dense. Will do quite well in poor soil and in dry situations. One of the best of all hedge plants as it will stand any amount of pruning. Thrives in either sun or shade. English Yew has this great advantage in hedges, in common with all the yews: the trees make uniform growth all along the line regardless of sun or shade. Hardy evergreen.

Thuja orientalis aurea nana (Berckmanns Golden Arborvitae)

Doubtless the most popular dwarf, golden arborvitae known. Almost globe-shaped, very compact, foliage vertical and bright gold. Very formal in appearance. Being a universal favorite and hardy, there are few plantings in which it cannot be used to advantage. It always adds tone and color. Height four to five feet.

DID YOU KNOW?

That it is possible to tell whether a corn plant will have red or yellow kernals by examining the number and arrangement of the chromosomes in a living cell taken from leaf, stem, root or any place from that plant.

Thuja orientalis beverlyensis (Beverly Hills Arborvitae)

A rapid growing oriental arborvitae. Foliage good, bright golden color the year round. The tree is usually laden with clusters of small green cones in the fall which enhance its ornamental value. A little pruning keeps it compact and when shaped into a tall, stately spire it just fits some land-scaping schemes. It is at its best when used as a specimen tree.

Thuja orientalis filiformis stricta (Pompadour Arborvitae)	
A most unusual tree. Foliage light green composed of a multitude of thread like branches. The tree is made up of many vertical stems but with a branchlets gracefully drooping all around the outside perimeter of the tree A rounded cone. Beautiful and hardy. 6-9 inches once transplanted	I e.
Thuja plicata (Giant Arborvitae) A native of the northwest quite generally distributed along the Pacific Coafrom Oregon northward and to the westward slopes of the Cascade Mt. The trees are thickly limbed well to the ground except in dense woods, the foliage being fresh and attractive at all seasons. It is a rapid grower under favorable conditions and grows into a symmetrical pyramid with little or no pruning. Quite hardy.	s. e r

Umbellularia californica (Oregon Myrtle) (um-bel-eu-lay' ri-ah)

A handsome, hardy evergreen tree, 25 to 30 feet in height and sometimes reaching 75 feet. Native of southern Oregon and northern California where it reaches its greatest perfection of growth along the streams and valleys of the Coast Range. The tree is conical in form and the leaves are highly aromatic. Well adapted to hedges. Sargent has described the Myrtle as "one of the stateliest and most beautiful inhabitants of North American forests, and no evergreen tree of temperate regions surpasses it in the beauty of its dark, dense crown of lustrous foliage."

VACCINIUMS (vak-sin' i-um)

Vaccinium ovatum (Evergreen Huckleberry)

First discovered by the Lewis and Clark expedition at the mouth of the Columbia River in 1805. One of the great beauties of the plant is the thick, waxy leaves of blended shades of green in spring and summer changing to a mixture of deep crimson and bronze in fall and winter. Its winter and spring colors utterly defy description. It is a rounded plant, many branched and of unusual density. A strong, vigorous grower standing unlimited shearing. Can be sheared into a hedge from one to five feet tall. At its best in partly shaded exposures. A hardy evergreen shrub of surpassing merit and a fine hedge plant. Berries small but abundant and of fine flavor.

DID YOU KNOW?

That the root system of a Crested Wheat plant will grow at the rate of 100 miles per year.

Vaccinium parvifolium (Red Huckleberry)

A lovely deciduous shrub native of western Oregon. Foliage dainty, bright green turning to dazzling shades of red and bronze in autumn. Does well in either sun or shade. Bark is red and in the spring the new buds give the plant a red sheen. Flowers pink and attractive followed in summer by a great profusion of bright red berries. These, though acid, are edible and used for jelly making. Its habit of growth, fine foliage, bright red buds and twigs, dainty flowers and showy red berries combine to make this shrub a splendid landscape subject. Hardy. Very rare in the nursery trade-

Viburnum davidi (David Viburnum) (vy-bur'-num)

A dwarf, broad leaved evergreen of great beauty, growing to a height of 2 to 3 feet with a spread of 4 to 5 feet. Leaves large, heavy, dark rich green giving this miniature viburnum an extremely luxuriant effect. Clusters of creamy flowers set in massed foliage. Hardy. Rare. A favorite with those who know it.
